

ATU MACHINES PVT. LTD

ISO 9001:2008

QUALITY POLICY

Our motto is to use advance technology to design & develop ergonomic, aesthetic and state of the art functional products that meet growing customer expectations, provide proactive product support, and be competitive in the market. These objectives are to be achieved through the implementation of a diligent quality management system, continuously monitored and bettered by appropriate levels of supervision. Supervisors are to ensure that the quality policy is understood, and complied with, by all personnel in the company.

Our objective is to design and manufacture fully automated high pressure hydro-pneumatic systems that not only meets customer requirements, bit also comply with established design codes and applicable statutory / regulatory requirements.

Quality Policy is to be achieved by

- ❖ Meeting statutory and regulatory requirements.
- ❖ Adhering to standard operating procedures.
- ❖ Involvement of all employees in continuous quality improvements
- ❖ Achieving measurable quality objectives and performance indicators at relevant functions and levels.
